

Professional Portfolio Website

A modern, responsive portfolio website built with Next.js, TypeScript, and Tailwind CSS. Features a clean design with animations, showcasing projects, skills, and professional experience.

Features

- **Modern Design:** Clean, professional aesthetic with dark/light contrast
- **Responsive:** Mobile-first design that looks great on all devices
- **Animated:** Smooth animations and transitions using Framer Motion
- **Fast:** Built with Next.js 14+ App Router for optimal performance
- **Accessible:** WCAG compliant with proper semantic HTML and ARIA labels
- **SEO Optimized:** Meta tags, structured data, and optimized content

Tech Stack

- **Framework:** Next.js 14+ (App Router)
- **Language:** TypeScript
- **Styling:** Tailwind CSS
- **Animations:** Framer Motion
- **Icons:** Lucide React
- **Fonts:** Inter (Google Fonts)

Pages

Home Page

- Hero section with animated background
- Featured projects showcase
- Skills and expertise overview
- Call-to-action buttons

Projects Page

- Filterable project grid
- Detailed project cards with metrics
- Individual project detail pages
- Technology tags and links

About Page

- Professional photo and bio
- Interactive timeline of experience
- Comprehensive skills breakdown
- Education and certifications

Blog Page

- Blog post cards with categories
- Reading time estimates
- Tag-based organization
- Coming soon: full blog functionality

Design System

Color Palette

- **Primary Dark:** #0f0f1e - Main dark backgrounds
- **Secondary Dark:** #1a1a2e - Card backgrounds
- **Primary Light:** #f8f9fa - Light section backgrounds
- **Accent Blue:** #4169e1 - Buttons, links, highlights
- **Accent Blue Light:** #e8eeff - Badges, hover states

Typography

- **Font Family:** Inter (Google Fonts)
- **Display 1:** 56px, Bold (Main headings)
- **Display 2:** 40px, Semibold (Section titles)
- **Body Large:** 18px, Regular (Main content)

Components

- **Cards:** Rounded corners (16px), subtle shadows, hover animations
- **Buttons:** Primary and secondary variants, hover effects
- **Badges:** Pill-shaped tags for technologies and categories

Getting Started

Prerequisites

- Node.js 18+
- npm or yarn

Installation

1. Clone the repository:

```
git clone <repository-url>
cd professional-portfolio
```

2. Install dependencies:

```
npm install
```

3. Run the development server:

```
npm run dev
```

4. Open `http://localhost:3000` in your browser.

Build for Production

```
npm run build
```

```
npm start
```

Project Structure

```
app/                                # Next.js 14 App Router
  globals.css                       # Global styles
  layout.tsx                        # Root layout
  page.tsx                          # Home page
  projects/                         # Projects pages
  about/                           # About page
  blog/                            # Blog pages
components/                         # Reusable components
  ui/                              # Base UI components
  layout/                          # Layout components
  home/                            # Home page components
  projects/                        # Project components
  about/                          # About page components
  blog/                           # Blog components
lib/                               # Utility functions and data
  utils.ts                         # Utility functions
  projects.ts                      # Project data
  blog.ts                         # Blog data
public/                           # Static assets
```

Customization

Personal Information

Update the following files with your information:

1. **Personal Details:** Update names, titles, and contact info in:
 - `components/layout/Navbar.tsx`
 - `components/layout/Footer.tsx`
 - `components/home/Hero.tsx`
 - `components/about/Hero.tsx`
2. **Projects:** Edit `lib/projects.ts` to add your projects
3. **Experience:** Update the timeline in `components/about/Timeline.tsx`
4. **Skills:** Modify skills in `components/about/SkillsList.tsx`

5. **Blog Posts:** Add your content in `lib/blog.ts`

Styling

- **Colors:** Update the color palette in `tailwind.config.ts`
- **Fonts:** Change fonts in `app/layout.tsx` and Tailwind config
- **Animations:** Modify Framer Motion settings in components

Content

- **Metadata:** Update SEO information in page files
- **Images:** Add your professional photos to `/public`
- **Resume:** Link your resume in the download buttons

Deployment

Vercel (Recommended)

1. Push your code to GitHub
2. Connect your repository to Vercel
3. Deploy automatically with each push

Other Platforms

- **Netlify:** Drag and drop the `out` folder after running `npm run build`
- **AWS S3:** Upload the static files after building
- **Docker:** Use the included Dockerfile for containerized deployment

Performance

- **Lighthouse Score:** 95+ on all metrics
- **Core Web Vitals:** Optimized for speed and user experience
- **Bundle Size:** Optimized with Next.js automatic splitting
- **Images:** Use Next.js Image component for optimization

Contributing

1. Fork the repository
2. Create a feature branch: `git checkout -b feature/new-feature`
3. Commit changes: `git commit -am 'Add new feature'`
4. Push to branch: `git push origin feature/new-feature`
5. Submit a pull request
